HPC Standards GmbH

Synthesis chemist organic chemistry
- B.Sc. or M.Sc. -

HPC Standards GmbH is a globally operating and constantly growing company based in Jesewitz near Leipzig. Our main field of activity is the production of high-purity reference substances for residue analysis.

To expand our synthesis department for the production of native and isotope-labeled reference substances, we are looking for a synthetic chemist to start as soon as possible **with the following profile:**

- Completed degree in chemistry (B.Sc./M.Sc.) or comparable qualification with a focus on organic synthesis chemistry
- Careful, clean and structured way of working as well as reliability paired with team spirit and a communicative manner
- Good written and spoken German and/or English skills
- Enjoyment of chemistry and a high level of commitment
- Experience in using MS Office products (Word, Excel, Outlook)
- Professional experience in organic synthesis chemistry is a plus

Future tasks:

- Independent planning and execution of organic syntheses

- Further development and optimization of synthesis processes
- Purification of products through crystallization, chromatography, and distillation
- Identity and purity determination using HPLC, LC/GC-MS, and NMR spectroscopy
- Evaluation and documentation of results
- Additional responsibilities if suitable

What we offer:

- a challenging position with changing projects covering a broad spectrum of organic synthesis chemistry
- a friendly and supportive team with flat hierarchies
- a modern and secure workplace
- flexible working hours
- company pension scheme
- annual company events
- regular further training
- free parking spaces
- job bike

Have we piqued your interest?
Please send your complete application materials via email to **hr@hpc-standards.com**, and be sure to include your salary expectations and your earliest possible start date.
In addition to your **resume** and relevant transcripts, please include a one- to two-page summary of your thesis (bachelor's, master's, or doctoral), **including a graphical representation** of your synthetic work (e.g., reaction schemes or synthesis sequences).

We look forward to getting to know you!
